Corresponding author: Srivatsan B, srivatsan359@gmail.com

Name of the Track: Track 1 – Information Systems: Theory and Practice (Digital Ethics and Policy: Regulation and Compliance)

Type of Submission: Ongoing research (design science research; artifact and technical evaluation completed, naturalistic evaluation pending)

Declaration on the use of generative AI

Claude (Claude Opus 5.5, Anthropic) was used under the authors' direction to assist the audit, implement much of ERMA-GRC, draft the scenario protocol, write and run the test scripts, propose outcome codings, produce the figures, support the literature search and DOI checks, and draft text.

The authors set the questions, approved each stage including the protocol before execution, verified sources and results, revised the text and take full responsibility. No AI tool is an author.
